Seamless Collaboration for your Design & Documentation Reviews

**Facilitating Smarter 2D & 3D Design Reviews
for Buildings & Plant Engineering Projects**

The need for Seamless 2D/3D Design Review Solution

When managing design & construction projects, organizations often encounter significant challenges in coordinating between engineering, project and vendor teams, which can hinder efficiency and drive up costs:

- 🚩 **Fragmented Processes:** Disconnected tools and workflows slow down collaboration
- 🚩 **Limited Accessibility:** Stakeholders struggle to access designs without specialized software
- 🚩 **Expensive Tools:** High costs for CAD licenses or review tools burden project budgets
- 🚩 **Construction Drawings:** Lack of intelligent tools for review and markup of vendor drawings

Share2Review

Share2Review addresses these challenges by streamlining and enhancing collaboration for users of Autodesk AutoCAD Plant 3D, Autodesk Revit, and CADISON.

Share2Review is a CAD-independent solution designed for efficient collaboration and management of design & construction projects. It enables design engineers, regardless of team location or setup, to collaborate effectively. With Share2Review, users can publish and share lightweight format redlining 2D Schematics and 3D Models, complete with geometry and metadata linked to the source drawings. This streamlines design reviews, enhances stakeholder collaboration, and significantly improves project efficiency.

Using Share2Review, engineering teams and stakeholders can seamlessly review, comment, and share 2D/3D designs without the need for complex or costly software. Its intuitive interface ensures ease of use, making it accessible for both technical and non-technical users.

Web Based Viewer

View drawings and models in any browser on any device, add annotations and comments

Measure

Measure distances, diameters, and angles in 3D models, add comments, and import them back into the source CAD system seamlessly

Web Markup

Create redlining comments in the web viewer itself and import them back into the source CAD systems

Embedded Viewer

Access drawings, models, components, and fittings, along with their associated details, without the need to open the original design files

PDF Markup

Generate 2D & 3D PDFs directly from CAD systems for redlining, annotate them with any PDF viewer, and seamlessly import comments back into CAD systems for visibility in drawings

Search and Filter

Easily locate components using metadata

Why Choose Share2Review?

- Enhanced Collaboration:** Engage stakeholders in real-time with features like web markup and PDF redlining, ensuring faster decision-making and streamlined workflows
- Accessibility:** Review and collaborate on 2D and 3D designs from any device, anywhere, using a web-based interface; no specialized software required
- Security:** Keep your data safe with flexible sharing options. Publish designs on a secure local intranet or the global internet without uploading source files to thirdparty clouds
- Cost Savings:** Eliminate the need for expensive CAD licenses for reviewers. Share2Review provides an efficient, cost-effective alternative for design reviews

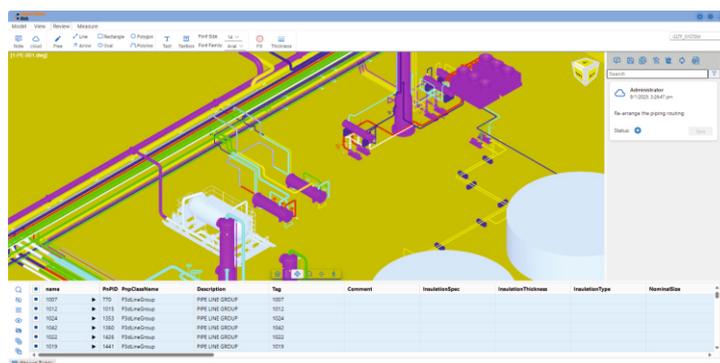

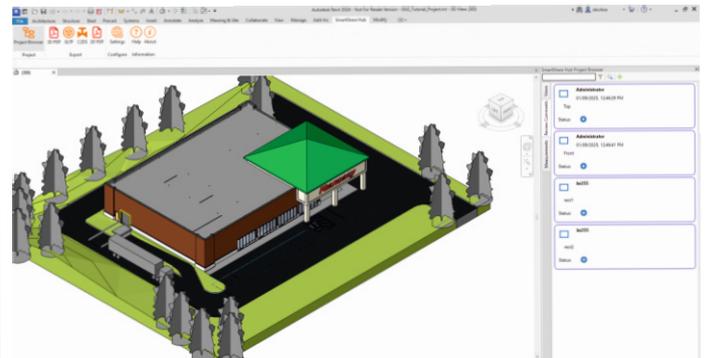

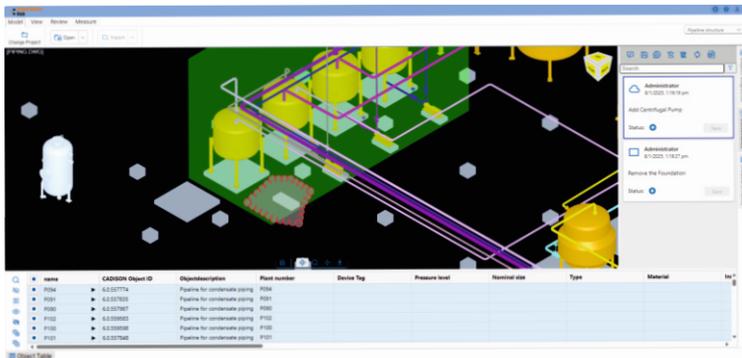

Tailored for Leading Platforms

Share2Review is designed to cater to the unique needs of users across major engineering platforms.

Share2Review plugin is available for:

In summary, Share2Review is a cost effective solution; designed to simplify complex workflows and speed up project delivery by optimizing design & vendors drawings review and approval processes.

Ready to Optimize your Design Review process?

Unlock the potential of seamless design reviews and streamlined collaboration with Share2Review
